

CHAPTER 11 At-Home Practice
Collecting, Describing, and Displaying Data

List the data values in the stem-and-leaf plot.

1.

1	1	2
2	3	4 6
3	2	8

2.

4	0	1	2
5	1	5	8
6	0	1	1 5
7	0	3	5 5 8

3. Use a line plot to organize the data: 8, 6, 6, 7, 4, 4, 5, 5, 6, 8.

Find the mean, median, and mode of each data set.

4. 15, 40, 22, 46, 7, 20, 22, 12
 mean median mode

5. 106, 46, 93, 98, 92, 95, 100
 mean median mode

6. A group of students had babysitting jobs over the weekend. Use the given data to make a scatter plot.

Name	Total Hours Worked	Amount Earned
Sheri	5	\$22.50
Jordan	8	\$36.00
Lydia	11	\$49.50
Alexis	6	\$27.00

7. Use the data from the scatter plot to predict the number of hours Sam would have to work to make \$30.

5. mean: 90; median: 95; mode: no mode 6. Points should be plotted at: (5, 22.50), (8, 36), (11, 49.50) and (6, 27); x-axis is hours worked, y-axis is amount earned 7. about 7 hours

3. Answers: 1. 11, 12, 23, 24, 26, 32, 38 2. 40, 41, 42, 51, 55, 58, 60, 61, 61, 65, 70, 73, 75, 78
 4. mean: 23; median: 21; mode 22

CHAPTER
11

Family Fun

Family Correlations

Record the heights and shoe sizes of at least ten different people. Use the graph below to make a scatter plot of the data you collected, placing the heights on the y -axis and the shoe sizes on the x -axis.

1. What kind of correlation does the data show? _____
2. Give an example of two data sets that would have a negative correlation. _____

3. Give an example of two data sets that would have no correlation. _____

4. Find the mean, median, and mode of each set of data that you collected. _____
